It looks like McKinley and the gold standard.

In Cochise county the Democrats made a clean sweep with the possible exception of two offices.

"Our Mark" is the delegate to Congress. He leads the silver forces in the territory to a triumphant victory.

The Pops did not elect a candidate on the county ticket. They have one consolation and that is the Republicans did not gather in much local pie either.

The dynamite gun in the hands of the Cuban insurgents is paving the way for liberty, but it is scattering death and destruction in its pathway.

A New York woman committed suicide because her husband rode a bicycle too much, all of which she could have cured him of in one week by buying a tandem.

A grand jury has discovered that many criminals stay in jail without trial. By investigating a little further it would have discovered that many more stay outside without trial.

A Los Angeles man claims to have discovered a process by which he can extract in a few minutes every particle of gold from the most rebellious ores at an expense of 85 cents per ton, and that with a plant costing \$1,500 he can work 40 tons a day without the use of water. It is probable that actual working results will not correspond with laboratory tests.

The annual meeting of the Arizona Agricultural association will be held in Phoenix on the 20th and 21st of this month. The program will be varied one, the papers and addresses to be presented covering many of the most important topics connected with the various branches of agriculture, horticulture, fruit growing, bee keeping, etc. At this meeting the general election of officers for the ensuing year will take place.

The Star makes the following admissions:

"There is one thing certain, there was a terrible amount of shouting for Buckey N'Neil, which did not crystallize into votes when the shouters went to the polls, especially in Tucson."

"Two years ago the bulk of Buckey O'Neill's vote was contributed by the Democratic party. The election last Tuesday seems to indicate his vote this time came mostly from the Republicans party."

The PROSPECTOR is greatly disappointed at the result of the recent election, for we had hoped the people of this country had borne the burdens imposed by the single gold standard long enough, but the returns prove we were mistaken; they must suffer the privations of a scarcity of money a while longer, but this want is self-imposed, and, as it is our belief that the will of the majority should be supreme, we gracefully submit to that dictum and wait another day.

It is the mission of the PROSPECTOR to do everything in its power for the advancement of the various industries of Cochise county and of Arizona. Our mining interests are paramount to all others at present, and every new location that is made within our borders, and every new company that is formed with the purpose of developing our mineral resources adds to our wealth, and our efforts will also be in their behalf. The Copper King Mining company, whose properties are located in the Warren mining district, and whose prospectus appeared in yesterday's issue of this paper, is composed of business men some of whom have lived among us for years, and are energetic, enterprising men. Their property is adjoining the famous Copper Queen, and no doubt will prove equally as valuable with development. This company expect to begin operations very soon and we wish them success.

BISBEE NEWS.

BISBEE, November 4, 1896.
COPPERINGS.

Everything in Bisbee today is as quiet as yesterday was alive and exciting. The people are still as interested as ever but are holding back and waiting for some definite information.

Fred Davy left this morning for Portland, Oregon, where he goes to look after important business. Fred does not know just how long he will be absent, and in fact has some doubts as to whether he will return at all.

Ben Williams, Prof. Douglas, and Walter Douglas, together with Tom Wright and Will Scott, left today for an investigating trip into Mexico. We do not know whether they are going down to the coal fields or are investigating mining property, but they expect to be gone several weeks and will evidently cover quite a little territory.

Well the great contest is over and the heavy joshers who put an independent candidate up against us have learned one more point in regard to the Australian ballot. The game was well got up in every way but they were not quite onto themselves when they went to the polls and walked into the booths like a lot of wind-blown hay seeds, wrote in the name of the Right Hon. James Munch on their ballots and then quietly forgot to put a cross before it. The poor suckers were running about this morning declaring that Jimmy had been counted out and threatening to have the election contested. It was not very long, however, before they had the little omission explained to them, upon which they each administered a hearty kicking to themselves and silently hunted their holes to appear no more until the incidents of the election were entirely forgotten.

BISBEE, Nov. 6, 1896.
COPPERINGS.

Joe St Armand left this morning for a short trip to Tombstone for his health. He expects to return in the course of a week or so.

There used to be lots of Pops in Bisbee but, judging from the number of votes given to Buckey, there has been a falling away from some cause or other.

Since the rainy season is a thing of the past and the time of year for cold nights has arrived, this ballwick is afflicted with an epidemic of bad colds.

Drummers continue to arrive by the score and as each appears to be satisfied with the orders they receive it augurs well for the commercial prosperity of our camp.

It reported that Black Jack intended to swoop in on Bisbee and rob the entire community. If he could rake in some of the winnings made on the recent election he would indeed have a plethoric purse.

Bisbee is the boss mining camp in the country, and bids fair to hold this most enviable position for years to come. The Queen is producing large quantities daily, and while the country has been convulsed from center to circumference over gold and silver, copper still is king.

The funeral of Mrs. Julian who died from typhoid fever yesterday, took place from her home this afternoon about 2 p. m. Deceased was the wife of Jas. Julian, a convertor man in the employ of the Copper Queen, and had only been married for a few months. She was well liked by her many friends all of whom extend their sympathy to the husband in his bereavement.

To whom it may concern. Notice is hereby given that I, W. C. Tyler, do hereby resign my so called position as chief of the Bisbee Hoodlums in favor of "Popcorn Jimmy" alias the "Chubber". The reason for this step is the action of the hoodlums during the last election when they all with one exception voted for "Jimmy the Duck Trailer," my independent rival, in spite of all protests, and with utter disregard to our feelings on the subject. As "Popcorn Jimmy" was the only one of the gang who would even consent to remain neutral in the matter, and also as he is probably better able to manage the gang than any other, we have decided to make the resignation in his favor. Long may he remain in peace.

Signed this 5th day of Nov. 1896.
W. C. TYLER.

Attest
ARTHUR LUTLEY,
1st. Asst. Chief Bisbee Hood.

PROSPECTUS

Of the Copper King Mining Co. of Arizona.

The PROSPECTOR has received a prospectus of a Cochise county mining incorporation which has 23 claims near Bisbee 15 of which adjoin the famous Copper Queen. There is no question but what some other excellent mines exist in this rich copper district and the formation of this company will, when the properties are worked, and enough money is said to be insured by the incorporators for its immediate working, will doubtless make another big producer within our confines. The company is incorporated for \$5,000,000 and the following New York men are at the head of the enterprise, B. C. Davis, W. H. Mack, Thos. F. Gaynor, Charles R. Lee and Jere R. Fleet; with offices at 168 Remsen St. Brooklyn, New York.

A limited amount of stock is placed on the board for machinery and development and the depository is given as the Long Island Safe Deposit Co. of New York. Fical agents are stationed at many cities and Blackburn and Mansur of Bisbee are the appointed agents at the copper camp through whom applications and particulars are furnished. Following in the prospectus in full—

In 1894 the United States produced 344,183,174 pounds of copper, valued at \$33,142,141. Copper ranks No. 4 in our mineral productions, the first in rank is pig iron, about \$125,000,000; second, silver, \$64,000,000; third, gold, \$30,000,000. Nearly all of this immense amount of copper was produced in three mining districts, each covering a limited territory, namely, Lake Superior, Montana and Arizona. The Lake Superior district produced nearly one-third of it. Montana produced slightly more than Lake Superior, and Arizona produced the greater part of the balance. The Calumet and Hecla mine, in the Lake Superior district, produces from forty to eighty million pounds annually, and has paid out to its stockholders over forty-three million dollars in dividends on a capital stock of only two and a half million dollars. The per value of the shares is \$25, and it now sells for \$315 per share; yet when the mine was a prospect, the stock sold for 50 cents per share, being 2 cent per dollar (share). The Anaconda, in Montana, produced copper to the value of eleven million dollars in 1894, and made net, over five million dollars. A controlling interest in this property was recently purchased by the Rothschilds for fifteen million dollars, and the gold was shipped in payment. The Copper Queen in Arizona is said to produce one thousand tons of copper per month. At ten cents per pound, this copper is worth \$200,000, or equal to a product of two million four hundred thousand dollars per year, and claims to have ore to run twenty-five years at the same rate. Unlike gold or silver, the copper mines in the United States are confined to three well known districts, and the deposits are in large deposits, not in small veins. "The average yield of copper per ton of ore in the Lake Superior district is only 1.83 per cent, equal to not quite forty pounds of copper per ton of ore; excluding the richest mines, the Calumet and Hecla, and the Tamarack, the yield is not quite 1 per cent., or only twenty pounds of copper to two thousand pounds of ore." Yet all the mines in this district pay large dividends, and produce the greatest quantity of copper. We quote from "Mineral Industries of the United States," compiled by the United States Geological Survey, and published under authority of the Government, pp. 158, 159: "The product of the Montana mines shows a yield of 7 per cent. The principal advantage of the Arizona mines, as competitors in the copper market, lies in the fact that the ore are relatively rich, yielding a fraction over 10 per cent., and are easily reduced to

block copper, being almost exclusively oxidized ores. It is interesting to aggregate one group of refiners which treats exclusively, high grade, pure material, like Arizona bars and Montana blister copper—works which produced over one hundred and five million pounds of refined copper, incurred only \$710,619 expense, or 0.69 cent per pound."

The Copper King owns fifteen full mining claims, 600 by 1,500 feet in area (about ten acres, or equal to one hundred and sixty acres in all), adjoining the properties of the Copper Queen, in the town of Bisbee, Cochise county, Arizona. Cochise county, occupies the southeastern portion of the Territory, and has an area of nearly six thousand square miles.

Again we quote: "Next to Tombstone, the most important town in the Territory is Bisbee, in the Mule mountains, about thirty miles south of Tombstone. Here are located the works of the Copper Queen mine. The company keeps five turnaces in constant operation—three of them of a capacity of fifty-five tons each per day, one other, a monster of a daily capacity of one hundred and fifty tons. The copper production of the last year was not far from twelve million pounds of bullion. The mines of the company are upon a magnificent body of ore that seems practically inexhaustible. About six hundred men are employed. The town has a population of about fifteen hundred, and is as quiet as any New England village." (pp. 169, 161).

The Copper King of Arizona also owns eight other claims, about seven miles northeast of Bisbee, at a place known as Solomon Springs, where the copper ore comes to the surface, and can be traced in large bodies all over the whole eight claims. This group has more than 75 per cent. better showing, on top, for a big mine than ever the Copper Queen properties had.

Again we quote: "This camp (Bisbee) and all the mines here lie in what is more properly called a mineral zone; there being no well defined leads or veins on the surface traceable for any distance; but the whole surface is covered with an iron quartz, highly mineralized, giving assays in gold from two to seventeen dollars per ton, with a small per cent. of silver; and as depth is attained invariably opening up into large bodies of rich copper ore. This has been the result of all prospects worked to any depth in this camp. All the ore of this camp are of a character called free smelting ores, carrying their own flux, and requiring only heat to extract the metal. Large coal fields have also been discovered less than forty miles distant, which undoubtedly adds great value to the properties of this camp." (pp. 163, 164).

From the best information obtainable (that is, of the miners themselves), we learn that the underground workings of the Copper Queen are close up to several of our adjoining claims, and where it has immense bodies of rich ore, all pitching toward our properties. These ores run from 10 to as high as 60 per cent. in copper, with frequent large masses of pure, native copper.

Every dollar of the proceeds of the shares sold will be put into sinking funds and developing three twenty-three claims, and taking out the ore, and erecting a smelter of a capacity of one hundred tons of ore per day. A minimum of 10 per cent. in copper (and it will average 20 per cent.) is 200 pounds of copper in 2,000 pounds of ore, which at 10 cents per pound gives the value of \$20 per ton to the ore; one hundred tons per day gives a gross product of \$2,000 per day. Figures the total expense of production at \$10 per ton (and it will not average \$10), we have a net product of \$1,000 per day; and for 300 working days we have \$300,000, applicable to division among the stockholders in the form of dividends; \$300,000 will pay a dividend of 5 per cent. on the par value of the whole capital stock, and leave a surplus of \$50,000 to go to betterment, and so to increase the product the second year, until in a few years we could equal the Copper Queen in the magnitude of our production. The

first year the stockholder will get as a dividend the amount per share which his stock has cost him, and will have a stock worth more than its face value in earning capacity, and can realize twenty for one on his money; and this stock will not only go to par, but it will go to way above par. This is not an estimate or prediction, but it is the actual history of all the great copper companies; and we have the best prospects in this country, and better prospects than any of them ever had at their inception; and we require only a comparatively small amount of capital to make a big mine out of these twenty-three claims, worth fully the par value of our capital stock, \$5,000,000. We estimate on no unknown quantities; we are not prospecting or hunting about in the rock at an expense of thousands of dollars to find a vein of ore as is done in gold and silver prospects, and trusting to the doctrine of chances for our returns; but we have the ore, and we have it in large and rich bodies; and we only require the money to sink shafts and 'take it out', and for the machinery to reduce it. The \$3,000,000 of stock is tied up in trust, and cannot be sold, cut up, transferred or assigned until sufficient of \$2,000,000 stock is sold to develop the property. We have no salaried officers or superintendents, but every cent is to go into the developing of the property. In making 5,000,000 one-dollar shares, we have proved that the \$5 or \$100 men shall come in on the ground floor equal with the \$5,000 or \$20,000 men. Every dollar equals every other dollar and will be worth \$20 within a short time, when it has been used on the property.

We have the samples of this ore in our offices. The recorded certificates of the location of these twenty-three claims, and the clean transfers of the title to this company are also in our offices and open to inspection.

We expect to begin work on the property within a short time, and after we begin, we shall make a complete quarterly report to the stockholders of just what is being done, the amount expended and the results.

WASHINGTON.—Incomplete returns from all but four counties in the state of Washington give McKinley 24,409; Bryan, 31,645; Congressman Donnell, Rep., 22,032; Hyde, Rep., 11,762; Lewis, Dem., 29,868; Sever, Rep., 29,149.

CHICAGO.—Indiana elected one silver Democrat and two Republicans for congress. Nebraska will send five silver Democrats and one Republican to congress, and Michigan will send one Fusionist and one Democrat; Minnesota offsets this with seven Republican congressmen.

NEW YORK.—Associated Press and Washington dispatches quote Chairman Babcock, who says he has complete reports from 193 congressional districts that have elected Republicans; 135 districts have elected Democrats or Populists, and 28 districts in which returns are incomplete; there will all be classed as doubtful with the prospect that at least one half outside may go Republican, which will make the total membership in the 55th congress 207. It is safe to say that under no circumstances will the membership fall below 200.

Minnesota has surprised everybody in the size of the Republican plurality. McKinley will have 35,000 more than Bryan.

North Dakota is sure for McKinley and South Dakota will be found in the same column, although the vote is close.

The Republicans claim Wyoming and Washington, but probabilities are against them in both states.

Oregon has gone for McKinley and Colorado has given Bryan heavy plurality; Idaho, Nevada and Montana have all gone for Bryan by heavy majorities, and from returns at hand California has undoubtedly gone for McKinley. Delaware has kept in the Republican column. The vote of Maryland has shown an interesting reversal from that of the last presidential election. Cleveland carried the state by 21,110; this year McKinley has a plurality of 21,09 in the city of Baltimore alone.

The states of Virginia, South Carolina, Florida, Georgia, Alabama, Louisiana, Arkansas, Colorado, Nevada, Montana and Idaho may safely be placed in the Bryan column.

New York.—Chairman Haun has issued a statement in which he says McKinley has 265 electoral votes and that he felt confident of 13 more.

OKLAHOMA.—Complete returns from all but 5 counties in the state give McKinley 3,911; Bryan, 37,831.

OUR MARK.

Will Carry the Territory by
1400 Plurality.

PROBABILITY.—Returns received from every county in the territory show Mark Smith will carry every county with the exception of three which are closely contested. His pluralities are computed at 1430 and if anything will be increased when complete returns are in.

Graham county will give the largest plurality for Smith giving him about 500; Maricopa 250; Cochise 175; Pima 200; Pinal 150; Yuma 125. A total of 1430.

Cocconino will give Doran about 50 plurality, Smith second; Yavapai will give O'Neill 75 plurality and Mohave the supposed Populist stronghold will give Buckey about 100 plurality over Smith second. Gila will give Buckey 40 plurality.

CHICAGO.—Returns received by the Associated Press indicate the probable election of McKinley and Hobart, although returns are so meagre from a number of doubtful states that this conclusion can only be reached by an estimate based upon gains and losses. The best estimate of reliable indicate that Main and Vermont have given majorities somewhat reduced from the special elections; that New Hampshire gives about 20,000; Massachusetts 120,000 and Rhode Island and Connecticut proportionate majorities, all for McKinley. New York is estimated at about 225,000 and Pennsylvania is likely to reach the same figure if not greater. Maryland has been carried by the Republican candidate for president by a majority exceeding 20,000, and Delaware is confidently claimed but apparently in dispute though the plurality is likely to exceed 1,000. Returns from West Virginia are not sufficient to justify the claim of either party. Ohio has given a very large Republican plurality and Kentucky apparently assured to the McKinley column, although later returns may not justify this claim. Tennessee seems to have been carried by Bryan, notwithstanding the assertion to the contrary of the Republican managers, and the same is probably true of North Carolina. Indiana and Michigan as well as Minnesota indicate a heavy Republican gain. Illinois will give McKinley 100,000 plurality. Nebraska and North Dakota are very close and still in doubt; Wyoming seems to have gone for McKinley.

In Michigan free silver papers concede the state to McKinley. West Virginia was conceded to McKinley by the Democratic state committee this evening. Tennessee is claimed by both parties. Returns are coming in so slowly that neither side seems justified in claiming the electoral vote with any confidence. North Carolina is claimed by both parties. No definite conclusion is possible at the present time. South Carolina, Georgia, Mississippi, Alabama and Louisiana are all for Bryan with normal Democratic majorities. Virginia electors will be for Bryan but have been elected by heavily reduced Democratic vote. It has been conceded to Bryan that Nebraska has gone with him notwithstanding Republican claims, but Kansas has yet said practically nothing but both parties claim the state. Wisconsin is sure for the Republicans by an enormous plurality.

SPRINGFIELD, Mass.—Spaulding and Pepper manufacturing company have started up its factory after a few weeks shut down pending the result of the election.

NEW YORK.—Returns received by Associated Press up to 2:45 p. m. today indicate that McKinley carried the following states: California, Conn., Delaware, Ill., Indiana, Iowa, Maine, Maryland, Mass., Minn., New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, West Virginia, Wisconsin.

Bryan carried the following states: Alaska, Arkansas, Colorado, Florida, Georgia, Idaho, Kansas, Louisiana, Missouri, Montana, Nebraska, Nevada, North Carolina, South Carolina, Tex., Utah, Virginia, and Washington—167 votes. Leaving in doubt Wyoming, Kentucky and South Dakota—20 votes.

CHICAGO.—Chairman Jones issued the following statement tonight: "The result of the presidential election is apparently no longer in doubt. We have claimed the election on our advice from states that were admitted in doubt in which we know there had been many frauds and from which there were evidences of tampering with the returns. It seems now to be apparent that Mr. Bryan, after making the most brilliant campaign in the history of our country, has not carried enough to insure his success in the electoral college. Thus this remarkable campaign closes with the election of William McKinley. The result was brought about by every kind of coercion and intimidation on the part of the money power including threats of lockouts and dismissals and impending starvation; by the employment of by far the largest campaign fund ever used in this country and by the subordination of a large portion of the American press."

LEWIS, Neb.—Mr. Bryan has sent the following telegram to Major McKinley: "Chairman Jones has just informed me that returns indicate your election and I hasten to extend my congratulations. We have submitted the issue to the American people and their will is law."

CINCINNATI.—The Big Four, Chesapeake and Ohio and Baltimore and Ohio railroads have all ordered their shops opened today and enlarged the force at those already running. The Ensign car works at Huntington, W. Virginia, resumed. The car works at Mt. Vernon, Illinois, got an order for 300 cars and will resume work. The furnaces at Ironton, Ashtab and other towns will go to blast soon. The Griffin Wood works and Powell Brass works have announced they will resume at once. Others announced that they have conditional order on which they will enlarge their force immediately. The big copper shops at Lorain, Ohio, have resumed work to their full capacity. One of the idle mills of the Dayton Pipe company will start in as soon as repairs can be completed and the Burns Iron works at Portsmouth announces it will employ full force immediately.

SANTA CRUZ.—Today machinery was ordered for a fuse factory to be built at the powder works at a cost of \$50,000. It will give employment to many men.

LEWIS, Mass.—The woolen and cotton mills of Ipswich corporation which have been shut down for some time, will start on full time early next week. Employment will be given to about 1,000 hands.

CHICAGO.—Returns from the entire country, although incomplete in some states, are of a nature to insure the election of McKinley. A sufficient number of states have declared for the Republican party to make certain 264 votes in the electoral college for its leader. The states whose votes are sure for him are as follows: Connecticut, 6; California, 9; Delaware, 3; Illinois, 24; Indiana, 15; Iowa, 13; Maine, 6; Maryland, 8; Massachusetts, 16; Michigan, 14; Minnesota, 9; New Hampshire, 4; New Jersey, 19; New York, 36; North Dakota, 3; Ohio, 23; Oregon, 4; Pennsylvania, 32; Rhode Island, 4; South Dakota, 4; Vermont, 4; West Virginia, 6; Wisconsin, 12 (Total, 264).

BEFORE AND AFTER

MANHOOD RESTORED.

This great Vegetable Preparation of a famous French physician, will quickly cure you of all nervous and diseases of the reproductive organs, such as Loss of Manhood, Premature Emission, Pains in the Back, Seminal Emissions, Nervous Debility, Impotence, Catarrh of the Bladder, Exhausting Drains, Varicocele and Gonorrhea. It stops all losses by day or night. Prevents quick return of discharge, which if not checked leads to spermatorrhea and all the horrors of Impotency. CUPIDENE restores the strength and vigor of the system and the ordinary organs of all importance.

CUPIDENE strengthens and restores small weak organs. The reason suffers are not cured by doctors is because ninety per cent are treated with Potassium. CUPIDENE is the only known remedy to cure without an operation. 100 testimonials. A written guarantee given and money returned if it does not cure. Send for prospectus and testimonials. \$1.00 a box, six for \$5.00, by mail. Send for prospectus and testimonials.
